

ROHAN MANISH JAUHARI

Boston, MA | rohanjauhari.com | jauhari.r@northeastern.edu | [linkedin.com/in/rohanjauhari](https://www.linkedin.com/in/rohanjauhari)

Summary

Product Manager who ships AI products end to end. 4 years owning roadmaps, leading engineers, and turning ambiguous problems into features people actually use. Built and deployed multi-agent AI systems outside of work. Graduating August 2026, looking to join an early-stage team where the problems are hard and the pace is fast.

Work Experience

Avo Automation (Growth Stage | No-code Automation SaaS)

Bengaluru, India

Product Engineer → Senior Product Engineer

August 2021 – July 2024

- **Cut manual effort by 90%** by leading AI enablement across the product: identified the biggest friction points in the user journey, defined the roadmap, and shipped it with 6 engineers and 2 designers
- **Grew the customer base by 33%** by working directly with prospects to understand their use cases, shaping pricing and product strategy around what actually moved deals forward
- **Reduced churn by 50%** by staying close to customers, gathering feedback across 100+ features, and closing gaps fast enough to change minds before they left
- **Drove 15% revenue growth in 6 months** by keeping a high shipping cadence across 50+ features and fixes, without letting quality slip

McKinsey & Company

Boston, MA

Product Analyst Co-op

August 2025 – December 2025

- **Reduced manual analysis time by 60%** by building an AI agent that let the product team query data in plain English instead of writing SQL every time
- Defined 50+ feature-level KPIs and built a full pipeline from raw data to leadership dashboards, giving the team a single source of truth for roadmap decisions
- Analyzed 100+ engagement metrics using Heap Analytics to surface adoption gaps and recommend where to focus next

Northeastern University

Boston, MA

Research Assistant

January 2026 – Present

- **Reached 85% prediction accuracy** on patient falls and hospitalizations by building an agentic monitoring system pulling real-time data from 5+ wearables

Projects

Nourish Agent — Chat-First AI Nutritionist [bit.ly/4tcbs2l]

- Most nutrition apps ignore what your body is doing today. Defined and shipped a chat-first AI nutritionist that pulls live wearable data in the background and adapts recommendations in real time, no manual logging required
- Architected a multi-agent system on n8n where nutrition, scheduling, and health monitoring run as isolated agents, each improvable without touching the others. Integrated Google Fitness, Gmail, Google Calendar, and Supabase via MCP

SwiftHire — AI Job Search Automation [bit.ly/4bHTql8]

- Surveyed 100+ jobseekers, found 10 concrete inefficiencies in the application process, and built 3 AI-powered features to fix them: auto-fill, real-time document tailoring, and bulk applying
- **Cut manual effort by 80%** and application time by 25% across active users

Education

Northeastern University, College of Engineering

Boston, MA

Master of Science in Information Systems (GPA: 3.73/4)

August 2026 (Expected)

The LNM Institute of Information Technology

Jaipur, India

Bachelor of Technology in Computer Science and Engineering

May 2021

Skills

Product

Product Strategy, Roadmapping, User Research, Agile, Metrics and KPIs, PRD, Go-To-Market, Prioritization, Market Analysis, Stakeholder Management

AI and Technical

AI Agents, Multi-Agent Systems, Python, SQL, Data Analytics, Full Stack Development, Cloud (GCP, AWS), MCP, n8n, Supabase, Heap Analytics
